Evolution of Data Center Demand Driving Need for Co-Located Primary + Backup Power Solutions

Power Density of Next-generation GPUs Necessitates Custom Power Solutions

"In 2027, AI server racks will require 50x more power than cloud equivalents five years ago... Public industry roadmaps from leading technology companies already target 1MW per rack" – Goldman Sachs Research

Generation Stack Required to Support Modern Industrial Loads

Larger, Complex Power Needs Drive a Need for a Generation Stack with Multiple Sources of Generation / Redundancy

Generation Stack Then (40-50 MW)

Generation Stack Now/Future (1+ GW) Microgrid w/ Integrated Primary Power, Inertia and Storage/Backup Power

As part of the generation stack, Solaris' Power-as-a-Service can provide longer-term primary plus back up power beyond initial bridge power needs.

Fully Integrated Model Enables Differentiated Power-as-a-Service Solution

Provide turnkey power solutions tailored to customer's needs

Custom Microgrids

Expertise in Design, Engineering, and Construction of Complete Microgrids

Comprehensive

Turnkey service includes Commissioning, Operations & Maintenance, & Balance of Plant

Reliable

Operational track record of delivering AI compatible 99.9%+ uptime

Scalable

Modular capacity design with an average 20 MW per generating unit

Speed to Market

>450 MW single-site deployment in <1 year

Technical Expertise

Skilled in managing variable loads, multiple voltage requirements, and complex operations

'Balance of plant' offering, enhanced by recent HVMVLV acquisition, provides enhanced earnings and return opportunity per deployment

SCR emissions control equipment enables generation to stay on location for multiple years

Eventual grid connection possible but efficient "time to power" achieved by initially staying off grid with reliability benefits of off-grid redundancy

Customized balance of plant offering enhances customer partnership (i.e., higher switching costs)

Power-as-a-Service Business Model Comparison

Solaris receives fixed monthly payments to provide co-located, behind-the-meter, turnkey service which includes the integrated provision of generation (turbines) and distribution (transformers, switchgear, and other ancillary equipment); Customer procures and pays for fuel

HVMVLV Acquisition Enhances Solaris’ Power-as-a-Service Offering

HVMVLV, acquired in August 2025, expands Solaris Power Solutions’ service offering, positions Solaris further upstream in power project planning, and enables differentiated full lifecycle technical support. HVMVLV is a specialty provider of complex electrical control and distribution equipment and associated engineering and technical design services.

Forward-Looking Statements

The information in this presentation includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Examples of forward-looking statements include, but are not limited to, our business strategy, our industry, our future profitability, changes in tariffs, trade barriers, price and exchange controls and other regulatory requirements, and the impact of such policies on us, our customers and the global economic environment, the success of Stateline Power, LLC (the “Stateline JV”), our joint venture to provide approximately 900 megawatts of primary power to a data center, and associated transactions and its impact on the financial condition and results of operations of our Solaris Power Solutions segment, the anticipated growth of our power capacity and sources of financing thereafter, the volatility in global oil markets, expected capital expenditures and the impact of such expenditures on performance, management changes, current and potential future long-term contracts, our future business and financial performance and results of operations, and the other risks discussed in Part I, Item 1A. “Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2024, which is on file with the U.S. Securities Exchange Commission (the “SEC”), Part II, Item 1A. “Risk Factors” in our Quarterly Report on Form 10-Q for the quarter ended March 31, 2025, which is on file with the SEC, Part II, Item 1A. “Risk Factors” in our Quarterly Report on Form 10-Q for the quarter ended June 30, 2025, which is on file with the SEC, and Part II, Item 1A. “Risk Factors” in our Quarterly Report on Form 10-Q for the quarter ended September 30, 2025 which is on file with the SEC. Our SEC filings are available publicly on the SEC’s website at www.sec.gov. Forward-looking statements are based on our current expectations and assumptions regarding the economy and other future conditions. Because forward-looking statements relate to the future, by their nature, they are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict. As a result, our actual results may differ materially from those contemplated by the forward-looking statements. Factors that could cause our actual results to differ materially from the results contemplated by such forward-looking statements include but are not limited to the factors discussed or referenced in our filings made from time to time with the SEC. Readers are cautioned not to place undue reliance on forward-looking statements, which speak only as of the date hereof. Factors or events that could cause our actual results to differ may emerge from time to time, and it is not possible for us to predict all of them. We undertake no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future developments or otherwise, except as may be required by law.

About Non-GAAP Measures

In addition to financial results determined in accordance with generally accepted accounting principles in the United States (“GAAP”), this presentation presents non-GAAP financial measures. Management believes that Adjusted EBITDA provides useful information to investors regarding our financial condition and results of operations because it helps facilitate analysis of operating performance. In particular, we view Adjusted EBITDA as an important indicator of performance. We define EBITDA as net income, plus (i) depreciation and amortization expense, (ii) interest expense and (iii) income tax expense. We define Adjusted EBITDA as EBITDA plus (i) stock-based compensation expense and (ii) certain non-cash items and extraordinary, unusual or non-recurring gains, losses or expenses. Adjusted EBITDA attributable to Solaris excludes the 49.9% non-controlling interest share of Stateline JV's Adjusted EBITDA attributable to our partner in the Stateline JV.

Although management believes the aforementioned non-GAAP financial measures are good tools for internal use and the investment community in evaluating our overall financial performance, the foregoing non-GAAP financial measures should not be considered as a substitute for or superior to other measures of financial performance prepared in accordance with GAAP. However, no reconciliations of these non-GAAP measure to their most directly comparable GAAP measures are available without unreasonable efforts. This is due to the inherent difficulty of forecasting the timing or amount of various reconciling items that would impact the most directly comparable forward-looking GAAP financial measures, that have not yet occurred, are out of our control and/or cannot be reasonably predicted given we have not completed any reporting processes for the periods presented.
